## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25 (in part), drawn to compounds and methods of making compounds wherein Q is O or S and wherein R<sup>1</sup>-R<sup>8</sup> do not combine to form a ring.

Group II, claim(s) 1-25 (in part), drawn to compounds and methods of making compounds wherein Q is NR<sup>10</sup> or N(C=O)R<sup>10</sup> and wherein R<sup>1</sup>-R<sup>8</sup> do not combine to form a ring.

Group III, claim(s) 1-25 (in part), drawn to compounds and methods of making compounds not included in Group I or Group II.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions are drawn to compounds and methods of making those compounds which do not share a common core and thus do not share a technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
